NOTICE OF EXAMINATION FOR REGISTRATION WEDNESDAY, OCTOBER 10, 1990

Pursuant to the provisions of 37 CFR §§ 10.5, 10.6 and 10.7, an examination for persons seeking registration before the United States Patent and Trademark Office as patent attorneys and agents will be held on Wednesday, October 10, 1990. The

deadline for filing applications along with the \$270.00 examination fee and all necessary showings required by 37 CFR §§ 10.7(a) and (b) is July 31, 1990.

With the exception of those persons who actively served four years or more in the examining corps of the United States Patent and Trademark Office for whom the examination may be waived, all persons who wish to become recognized to practice before the United States Patent and Trademark Office in patent cases must, pursuant to the above noted rules, pass the examination. Note that passing the examination does not qualify one for recognition for practice before the Patent and Trademark Office in trademark cases. Such recognition is governed by 37 CFR § 10.14 which does not require the passing of an examination.

There is no limit on the number of times the registration examination may be taken. The examination consists of two parts, a morning section and an afternoon section. To pass the examination, an applicant must pass both sections. An applicant who passes one section of the examination, but who fails the other section, will not be required to retake the section passed, provided the applicant takes and passes the section failed in one of the next three examinations regularly scheduled by the Patent and Trademark Office. If the applicant does not pass the section failed in one of the next three examinations scheduled, the applicant must retake both sections of the examination. No extensions of time will be granted except in extraordinary circumstances, e.g., an accident or hospitalization just prior to the examination which prevented the applicant from taking the examination.

Application forms may be obtained from the Office of Enrollment and Discipline, Suite 810, Crystal Park One, 2011 Crystal Park Drive, Arlington, Va., or by mail addressed to U.S. Patent and Trademark Office, Box OED, Washington, D.C. 20231.

PRACTICE BEFORE THE PATENT AND TRADE- MARK OFFICE - GOVERNMENT EMPLOYEES

On October 4, 1988, the Federal Register contained a notice removing section 10.6(d) of Title 37 of the Code of Federal Regulations. 53 Fed. Reg. 38,948, October 4, 1988. A decision in the U.S. District Court for the District of Columbia held that paragraph (d) was invalid to the extent that it precluded registration of an otherwise qualified individual solely on the basis of his or her status as a U.S. Government employee. *Athridge v. Quigg*, 655 F. Supp. 779, 3 USPQ2d 1391 (D.D.C. 1987).

Under section 10.6(d), registered patent practitioners who were disqualified by statute from practicing as an attorney or agent in patent proceedings or other matters before Government departments or agencies were endorsed on the register as "inactive." By removing section 10.6(d), U.S. Government employees, not employed by the U.S. Patent and Trademark Office, may now be registered as "active" on the register irrespective of their official duties. *In re Athridge*, 4 USPQ2d 1656 (Comm'r Pat. 1987).

The Office of Enrollment and Discipline (OED) has compiled the names and addresses of registered patent attorneys and agents, not employees of the U.S. Patent and Trademark Office, who are currently endorsed as "inactive" on the register. On November 30, 1989, a letter was sent to the each of these individuals at the last address furnished to OED informing them that they may change their status to "active."

IMPROVEMENT TO SERVICES

New File Ordering Service Introduced—Members of the public can avoid standing in line to order patent files and instead can place orders using two computer terminals which have been installed in the Patent Search Room. The terminals are located next to the windows on the east side of the north stack area near the mezzanine elevator.

These terminals have been made available so that requesters may determine the location of files for *issued patents* and to place orders for them. Files ordered via the terminals may be picked up from the Files Information Unit (CP3-1D01A) in the usual manner. Instructions for using the terminals are posted at each terminal.

HELPFUL HINTS

Here are some helpful hints for facilitating the assignment recordation process:

1. Each assignment should be submitted with a cover letter. This cover letter should include, at a minimum:

- application, patent or registration number of the application, patent or registration being transferred;
- name of the party transferring the application, patent, or registration and to whom it is being transferred;
- brief description of what the document intends to accomplish (such as an assignment, a security agreement, or a license);
- total fee submitted or to be charged to a deposit account (at \$8 per application, patent and registration being transferred) and the deposit account number. Avoid statements such as "Please charge the appropriate amount to my deposit account." However, you may authorize any additional fees to be charged to the deposit account to avoid receiving a non-recordation notice for insufficient fees.
- address to which the document should be returned after it is recorded by the PTO.

Cover letters should be formatted for easy reading.

2. Each assignment should be accompanied by a separate cover letter. More than one application, patent, or registration can be identified in an assignment.
3. If an assignment is submitted with a new application, send two separate cover letters - one for the application and one for the assignment.
4. Assignment documents which transfer an interest in both patent and trademark matters are first processed through the automated patent assignment recordation system and then through the manual trademark assignment recordation system. This sequential processing causes a delay in returning these assignment documents. To avoid a delay, submit separate assignment documents, one for patent matters and one for trademark matters, each with its own cover letter.
5. All assignments should be submitted on bond weight paper that is no larger than 8 1/2" x 14". Only the front side of each sheet should be used, and a one inch margin should be left on all sides of each sheet of paper.
6. Assignments filed with new applications are stamped with the application number. Assignments of new applications not filed concurrently with the application should be held until the application number can be provided in the cover letter.
7. All assignments should be mailed to BOX ASSIGNMENTS unless they are filed concurrently with a new application.
8. Requests for assignment services (recordation, abstracts, certified copies) should be carefully proofread to ensure document numbers and addresses are correct.

SERVICE STATISTICS DEFINITIONS

The number of days to record patent and trademark assignments that is presented in the Service Statistics portion of the Official Gazette represents the time the majority of assignments are being recorded (mode). Some assignment documents will take a shorter or longer time. The two week date range for returning documents stated in Service Statistics represents the majority of documents being mailed on the last work day of the reporting period. Once again, this date is not absolute.

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effective access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Control No. 90/000,749

DECISION ON
PETITION

Filed: March 28, 1985
For: U.S. Patent No. 4,042,890

Petitioner Eckerle filed a petition on March 30, 1990, under 37 CFR § 1.181, or in the alternative under 37 CFR § 1.182, seeking review of a Notice of Intent to Issue a Reexamination Certificate entered March 22, 1990, indicating the cancellation of claims 1-16, all the claims of the patent. Petitioner requests the Commissioner to direct entry of an amendment filed Feb. 7, 1990, and to issue and publish a reexamination certificate indicating the

patentability of claims consistent with that amendment. The petition is denied.

In *In re Eckerle*, No. 89-1552 (Fed. Cir. Dec. 8, 1989), the Federal Circuit affirmed the examiner's rejection of claims 1-16 (all the claims in the patent) under 35 U.S.C. § 112, first paragraph, for lack of written description of an added limitation to claim 1, and the rejection of claims 1-6, 10-13 and 15 as unpatentable under 35 U.S.C. § 103. The Federal Circuit's mandate issued on December 29, 1989. Reexamination proceedings were terminated in this case when the PTO received the mandate on Jan. 3, 1990. No claims were allowable at the time the reexamination proceeding terminated.

Under 35 U.S.C. § 306 and § 144, the Federal Circuit's mandate and opinion shall govern further proceedings in the case. Under 35 U.S.C. § 307, when any appeal proceeding has terminated, the Commissioner will issue and publish a certificate cancelling any claim of the patent finally determined to be unpatentable. The examiner's Notice of Intent to Issue a Reexamination Certificate indicating the cancellation of claims 1-16 was proper.

The Commissioner lacks authority to reopen the reexamination proceeding after receipt of the mandate where all claims have been rejected since the case is no longer considered pending. See MPEP § 1216.06 (5th ed., rev. 12, July 1989) under "Office Procedure Following Decision by the Federal Circuit," subheading "1. All claims rejected"; *In re Willis*, 537 F.2d 513, 515, 190 USPQ 327, 329 (CCPA 1976) ("When, on January 12, 1976, our mandate was received in the PTO, no claims having been allowed, the appealed application suffered its demise."); *In re Jones*, 542 F.2d 65, 69, 191 USPQ 249, 252 (CCPA 1976) ("[R]eceipt of the mandate by the PTO terminated proceedings in the case"); *Continental Can Co. v. Schuyler*, 326 F. Supp. 283, 284, 168 USPQ 625, 625 (D.D.C. 1970) ("[W]here rejection of all claims is affirmed by the Court of Customs and Patent Appeals, as in this case, the responsibility is upon the plaintiff to stay the Court's judgment if the pendency of the application is to be preserved"); *Morganroth v. Quigg*, 885 F.2d 843, 847, 12 USPQ2d 1125, 1128 (Fed. Cir. 1989) (Commissioner does not have authority to revive application abandoned by termination of proceedings resulting from a failure to appeal a final district court judgment). Petitioner's relief, if any, lies in a motion for the Federal Circuit to withdraw its mandate, not with the Commissioner. See *Jones*, 542 F.2d at 68, 191 USPQ at 252 (CCPA "has the power, in the interest of justice, to recall its mandate in an appropriate case, and this power should be exercised sparingly and only upon a showing of good cause").

The petition does not state all the material facts. In particular, it fails to mention the dispositive fact that all claims were rejected under 35 U.S.C. § 112, first paragraph, at the time reexamination proceedings terminated. The examiner stated in the Notice of March 22, 1990, the Commissioner lacks jurisdiction to reopen the reexamination proceedings after issuance of the mandate where no claims have been allowed. Petitioner fails to address the issue of the Commissioner's authority to reopen the reexamination proceedings. Petitioner's arguments that the amendment was timely because "no adequate opportunity was presented until at least the decision of the Board to file the attached amendment" (Petition, page 3), and that an amendment presented after the decision of the board would "have merely been held in abeyance pending the outcome [in the Federal Circuit]" (Petition, page 3), are unpersuasive. The amendment could have been filed after the Federal Circuit's decision and before issuance of the mandate; instead, the amendment was not filed until 5 weeks after receipt of the mandate.

The petition is denied.

Reexamination proceedings are to be conducted with "special dispatch." 35 U.S.C. § 305. In order not to unduly delay issuance of the reexamination certificate, petitioner is given ten (10) days to file any request for reconsideration.

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification*, *Index to the U.S. Patent Classification*, *Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effective access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

HANDLING OF STATUS INQUIRIES

This notice is intended to supplement the discussion set forth in the *Official Gazette* Notice published at 893 *Official Gazette* 810 entitled "Status Inquiries" (Dec. 21, 1971).

It has come to the attention of the Patent and Trademark Office (PTO) that its employees may have improperly released confidential information concerning pending applications. Specifically, issue date and patent number information assigned to pending applications may have been improperly released.

No information concerning pending or abandoned patent applications (except reissue applications and reexamination proceedings) may be given to the public by the PTO without the authorization of the applicant or the assignee or attorney or agent of record. 35 USC § 122 and 37 CFR § 1.14. Other exceptions are specified at 37 CFR § 1.14.

However, PTO employees will release information on the status of patent applications to the applicant or assignee or attorney or agent of record if the identity of the requestor can be adequately verified as set forth below.

Telephonic status inquiries should continue to be directed to the PTO clerical personnel. The PTO clerical personnel will obtain the caller's full name, the application serial number and the caller's telephone number. The PTO clerical personnel will ask the caller if there is an attorney or agent of record.

If there is an attorney or agent of record, the PTO clerical personnel will ask for his/her registration number. If the registration number is not known, the PTO clerical personnel will ask for the name of the attorney or agent of record. The PTO clerical personnel will inform the caller that an attorney or agent of record will be called after verification of his/her identity and that the requested status information concerning the application will be released to that attorney or agent.

If there is no attorney or agent of record, the PTO clerical personnel will ask the caller why he/she is entitled to information concerning the application. If the caller identifies himself/herself as an applicant or an authorized representative of the assignee of record, the PTO clerical personnel will ask for the correspondence address of record. Then, the PTO clerical personnel will inform caller that his/her association with the application must be verified before any information concerning the application can be released, and that he/she will be called back. If the caller indicates that he/she is not an applicant or an authorized representative of the assignee of record, the PTO clerical personnel will inform caller that no information concerning that application will be released.

The PTO clerical personnel will then verify the identity of any caller claiming to be associated with the application by checking the Patent Application Locating and Monitoring (PALM) system or the application file.

If an attorney or agent is of record in the application, the PTO clerical personnel will release the status information concerning the application by calling the attorney's or agent's telephone number obtained from PALM or the application file.

If the applicant or an authorized representative of the assignee of record requests information, and there is no attorney or agent of record and the correspondence of record has been verified, the PTO clerical personnel will release the status information to the caller using the telephone number given by the caller. If the caller's association with the application cannot be verified, no information concerning the application will be released. However, the caller should be informed that the caller's association with the application could not be verified.

In handling an in-person status request, PTO clerical personnel will ask the requester to wait while verifying their identification as set forth above.

ACCEPTANCE OF DELAYED PAYMENT OF MAINTENANCE FEES IN EXPIRED PATENTS

Pursuant to 37 CFR § 1.183, the Commissioner is suspending that portion of 37 CFR § 1.378(c)(3) requiring a showing of circumstances "entirely outside the control of the patentee and those acting on behalf of the patentee" in paying the maintenance fees pending a notice of proposed rulemaking. The requirement is being suspended in light of the decision in *In re Patent No. 4,429,775*, and because a credible argument can be made that the requirement is contrary to law.

The Commissioner will continue to look at the circumstances supporting unavoidable delay claims and diligent action by the patentee in petitioning for reinstatement. If any party believes a

petition has been wrongly denied under 37 CFR § 1.378(c)(3), a renewed petition will be considered.

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification*, *Index to the U.S. Patent Classification*, *Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effective access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 2:0).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. CL." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
